schwabr@villageoflombard.org

We greatly appreciate your patience as we improve the sewer system!

Project News

Work and Sequencing:

Work for the Large Diameter Combined Sewer Project is again underway. This project uses *trenchless technology*, which avoids digging or excavation.

In order to complete the work, the contractor will need to access the sewer via manholes. The work will be from 44/45 E. Washington westward across Main and through the Green Valley Subdivision, which is bounded by Hickory, Washington, Park, and Elizabeth, as well as along Hickory towards Finley.

The cleaning contractor will begin by cleaning the sewer west of Main, while the lining contractor will start at 44/45 E. Washington and continue westward, following the cleaning operations.

What to expect:

- The contractor will use a sewer cleaning truck to spray and inspect (televise) the sewer.
- After cleaning, access will again be required to spray the liner.
- This process will occur in multiple phases, as only half of the pipe may be lined at a time.
- Equipment and personnel will occupy a significant portion of the street during working hours.

Your cooperation and patience during this project is appreciated!

Communication:

- ♦ Look for door hanger notices announcing activities that affecting you, primarily regarding access and parking.
- ♦ The Village's project page is at <https://www.villageoflombard.org/544/FY2024-Large-Diameter-Combined-Sewer-Reh>
- ♦ For timely email or text message updates sign up for Notify Me® www.villageoflombard.org/notifyme.
