Traffic Access & Safety Precautions

### Please be Advised

The Village's Contractor, R.W. Dunteman Company is scheduled to perform work on your street. Weather permitting, the project is scheduled to start the week of June 18th, 2018, and should be completed within 2-3 weeks.

The project consists of removing 2.5" of asphalt from the street, patching, spot replacement of curb and sidewalk as needed and adjustment of drainage structures. When this phase is completed the street will be sprayed with a bituminous tack coat and then resurfaced with 2.5" of asphalt.

### Keeping You Informed

Individuals are encouraged to sign up for the free Notify Me® service through the Village website [www.villageoflombard.org](http://www.villageoflombard.org). Notify Me® provides timely email or text message project updates, and this information will not be shared or used for any other purpose.

### Traffic Access & Safety Precautions

Although limited traffic can be supported in the work zone, motorists should avoid these areas. It is essential that no cars are in the way of contractor's equipment; therefore avoid parking on the streets in your area during the day. The Police Department will be notified and the Contractor will be placing "No Parking" signs in the area. Furthermore, please avoid watering your lawn the day prior and the day of asphalt resurfacing.

Driveway access will only be impeded when equipment is directly in front of the driveway. The tack coat takes about 45 minutes to dry. If it gets on your vehicle, it may be removed with soap and water or a bug and tar remover. WD40 works well, also.

In addition, driving onto a driveway before the tack coat has dried may cause the driveway to stain.
