Keeping You Informed

Improved surroundings in fall 2018

Looking Back

The Westmore-Meyers Road corridor was evaluated for improvements and has undergone several project iterations with public involvement from Village committees. The final improvement project was approved by the Village Board in 2018 as a standard roadway resurfacing project.

What's Ahead

Westmore-Meyers Road, between Roosevelt Road and St. Charles Road, will receive infrastructure improvements in fall 2018 including roadway resurfacing (without any changes to the existing lane configuration) and path crossing improvements at the Great Western Trail and Illinois Prairie Path. Motorists should expect lane closures and travel delays throughout the project duration. This project involves the Village of Lombard, DuPage County, and the Illinois Department of Transportation (IDOT), and the project is subject to the regulations and requirements of the State of Illinois.

Arrow Road Construction is the general

contractor, and Mr. Brian Witkowski is the Village's on-site representative. Prior to construction, residents should remove personal items from Village / IDOT right-of-way (between the sidewalk and the roadway).

Most driveways are anticipated to remain accessible throughout the project. Motorists and residents are reminded to exercise caution in construction zones and to obey all traffic laws. The Village appreciates your patience during this improvement project.

Keeping You Informed

More project information may be found online at www.villageoflombard.org/westmore. Physical newsletters will be delivered and will also be available on the webpage. Individuals are strongly encouraged to sign up for the free Notify Me® service that is available at www.villageoflombard.org/notifyme or by contacting Public Works.
