## Project News

### Progress:

The contractor is concentrating efforts on completing the underground utility work between Prairie Avenue and View Street. The sanitary sewer main between Prairie Avenue and View Street has been replaced, and the services to homes on the west side are connected. Services to the homes on the east side that had been combined are now being separated, and this has required work into the roadway.

Water services to homes on the east side within the current work zone will now be transferred from the older 6-inch main to the other 12-inch main. Fire hydrants and water valves will also be replaced, requiring occasional water shut-offs after 9:00 AM and lasting up to 4 hours. Look for door hanger notices advising you of when water service will be unavailable. After completing the underground utility work, the sidewalks and driveway aprons will be replaced.

### Reminders:

- ◆ *Garbage, recycling and yard waste service occurs between 5:30 AM and 7:00 AM on Tuesdays. This modification to weekly service will be in effect until further notice.*
- ◆ *Look for door hanger notices announcing activities that affecting your individual household, including water service interruption (due to hydrant & valve installs) and driveway access.*
- ◆ *Keep water on hand in the event of an unexpected water service interruption.*
- ◆ *Notice where the contractor is working as it may affect your ingress and egress.*
