

N. Grace Street Utility Improvements Newsflash

Dear Resident:

July 18, 2023

Sidewalk and Driveway Restoration

Forming of the sidewalk and concrete aprons between East Prairie Avenue and East View Street will begin on Wednesday, July 19th, and will continue until Friday, July 21st. Forms for the sidewalk will be gapped at driveways allowing vehicle access. **The placing of concrete is scheduled for Monday, July 24th. Driveway access will be available until 6:45 AM Monday, July 24th. Barricades will be left on driveway aprons for approximately 3 to 5 days.** Once test results indicate that the concrete has sufficiently cured to support the weight of motor vehicles the barricades will be removed and access restored. Residents can walk on the concrete after 24 hours.

If the work is postponed, you will be notified via Notify Me and another hand-delivered newsletter. **This applies to those locations where a driveway apron or a portion of the sidewalk by the apron has been removed.**

Please minimize your ingress and egress when the contractor is working in the vicinity of your home.

Please use your parking passes and park on adjacent side streets. Follow all posted parking restrictions. **Do not park close to fire hydrants or mailboxes. Do not park near any North Grace Street intersections as concrete crews and delivery trucks require room to enter and leave the job site.**

Construction-related questions should be directed to the Resident Project Representative, Mr. Jim Snell, at 815.444.3321. Administrative questions can be directed to Mr. Ray Schwab at the Lombard Public Works (630.620.5740). When calling after normal business hours, please leave a message for Public Works Administration and your call will be addressed the next business day. If your call is a construction-related emergency, please press zero and you will be directed to the Police Department.

Sincerely,

Village of Lombard
Public Works Department
