

DOWNTOWN SIDEWALK IMPROVEMENT PROJECT

NEW PHASE: SOUTH PARK AVENUE

SOUTH PARK AVENUE PEDESTRIANIZATION

During the Village Board's meeting on October 19th, the board approved a new phase of the Downtown Sidewalk Improvements Project to convert South Park Avenue into a pedestrian-oriented space. The project involves removing parking from the west side of South Park and expanding the sidewalk area. Notably, the road will still allow southbound motor vehicle traffic and parking on the east side of the block. The design will also incorporate improvements that will allow the Village the flexibility to temporarily close the roadway for activities and events.

The Village is planning to award a contract for the construction of improvements in late 2023 and will begin the construction process in conjunction with the ongoing work along St. Charles Road. The Village will continue to ensure that customers have access to all businesses throughout the project area.
