and press zero,
or 911

Dear Resident/Business Owner,

A manhole near your home will be repaired as part of the 2024 Manhole Rehabilitation Program. Starting the week of September 3, 2024 (weather permitting) and over the next 4 to 5 weeks, Structured Solutions, L.L.C. of Union City, Indiana will be repairing sanitary sewer manholes located within the Village right-of-way or a utility easement.

The 2024 program includes approximately 40 manholes at various locations. These manholes were previously inspected by video and found to require repair. The work will address numerous deficiencies such as deteriorated surfaces, cracks that allow the inflow of groundwater/stormwater, and deterioration at the bottom of the manhole that impairs the proper flow of sewage through the structure. Some manholes may involve multiple visits depending upon the nature of the repair.

The work should not impact your sanitary service. However, equipment and personnel will be present, and temporary lane reductions may be established. If impacts are more extensive, you may be contacted by Village staff or the Contractor.

For additional details about the Manhole Rehabilitation Program, including maps, visit www.villageoflombard.org/manholerehab Ray Schwab, Civil Engineer II, of the Public Works Department will oversee the project. If you have any questions or concerns, he can be reached at publicworks@villageoflombard.org or (630) 620-5740.

Regards,

Village of Lombard
Public Works Department
